POS 1100

1. On 21 November, 200 Germany asked a report to Washington titled "Hitler's Activities Regarding Espionage". The reference is to Theodore Hink, Coordinator for Espionage Questions in the German Government. I suggest that if you have not already seen it you receive a copy of this cable and refer particularly to Paragraph 6.

2. It has been agreed with us, so that we will request no demand to investigate the espionage work mentioned. We all agree that a commitment such as suggested by Hink could not be made by the US. However, we want to investigate the question of setting up an expert-mixed laboratory such as Hink suggests, and the top selection of the Agency has charged me with seeing that the matter is thoroughly looked into. Please let us know what you can find out regarding the desirability of setting up such an institution and the practicability of putting it into effect.
